

Handheld Microphone

Technical Data

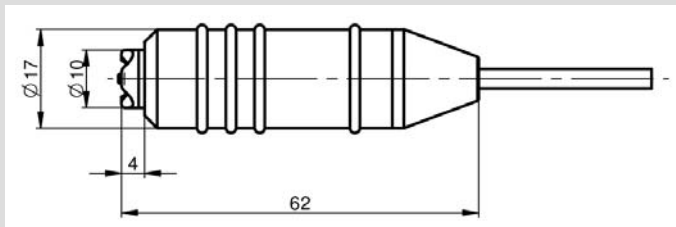

Signal recording:	Acoustical for mechanical watches
Beat number:	3'600 – 43'200 a/h
Signal sensor:	Rounded spring loaded 1 mm front pin
Protection:	Delrin 10 mm, white
Cable length:	1.80 m
Plug:	DIN 5

Description

Easy and convenient handheld microphone. It is connected instead of the stand microphone at the current Witschi test equipments for mechanical watches.

By the signal recording on the glass, watches can be quickly tested without clamping on a standard microphone.

Ideal for the incoming and pre-delivery inspection, as the relocation of the watches is no longer required.

Product

Item Nr.: **53.3110**

Highlights

- Small and handy
- Signal reception on the watch glass
- For tests the watches can remain in the box
- Can be used with different test equipments
- Good handling thanks a long cable
