## **TECHNICAL GUIDE**

•The explanation here is only for the particular point of Cal.VJ5\* series

### I .STRUCTURE OF THE CIRCUIT BLOCK

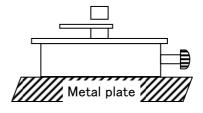

Notes: Since the circuit block and coil block are made by one piece, in disassembling and reassembling take care not to cut the coil line.

### II.REMARKS ON DISASSEMBLING AND REASSEMBLING

- (1)HAND
  - ·How to install hands

Place the movement directly on a flat metal plate or the like to install the hands.

② Intermediate wheel for day corrector Set the intermediate wheel for day corrector in the direction as shown in the illustration at right.

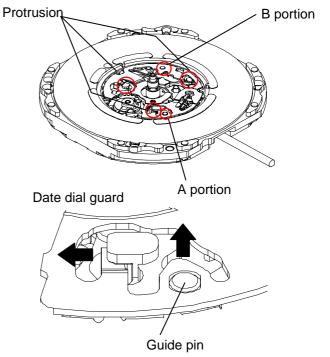

\*Cal.VJ52 not Intermediate wheel for day corrector.

3 Date dial guard

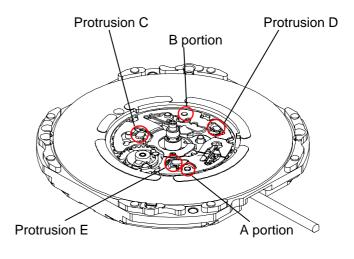

The date dial guard has three protrusions to be caught under the main plate, and it is also fixed by two guide pins.

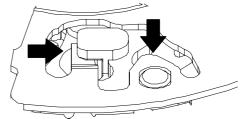

- How to remove
- Lightly lift the A portion of the date dial guard with tweezers to release it from the guide pin, and then move it in the clockwise direction until it gets off the guide pin.
- 2) Release the B portion of the date dial guard in the same way as described above, and then move it in the clockwise direction until it gets off the guide pin.
- 3) Check that all the three protrusions of the date dial guard have come off from the main plate, and then remove the date dial guard.

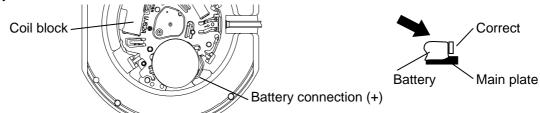

- · How to install
- 1) Put the date dial guard on the main plate so that the A and B portions are over the guide pins, as shown in the illustrations at right.
- 2) Move the protrusion D of the date dial guard in the counterclockwise direction so that it is caught under the main plate.
- 3) Slightly move the protrusions C and E in the counterclockwise direction alternately to set them under the main plate. Then, set the A and B portions of the date dial guard to the guide pins.
- 4) Check that the date dial guard is fixed securely to the main plate.

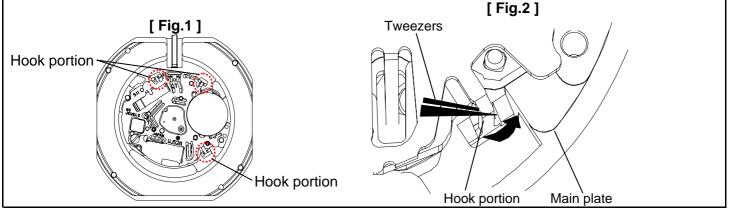

### 4 Battery

How to install battery
 Insert the battery aslant in the direction shown by the arrow.
 Check the battery connection (+) securely touches the side face of the battery.

- ⑤ Battery connection (+)
- How to install

Have the hook portions (3 places) catch the main plate (Fig.1&2). In disassembling and reassembling , take care not to deform the hook portions. After installing the battery connection (+), check that the three hook portions securely catch the main plate.

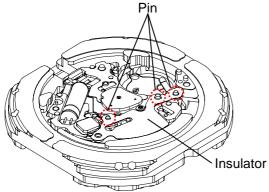

# **TECHNICAL GUIDE**

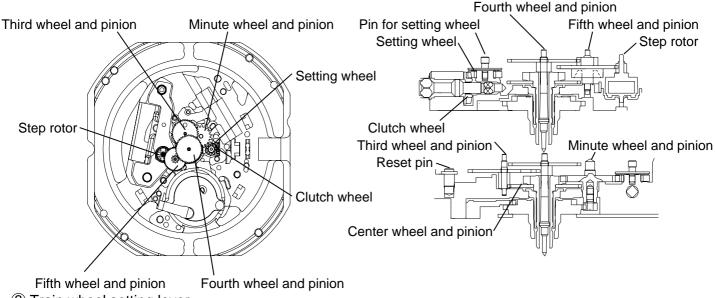

- (6) Insulator
- Setting position

Notes: To insulate between the battery connection (+) and the battery connection (-), Insulator should be put at the three pin securely as bellow.

- 7 Train wheel bridge
- Setting position

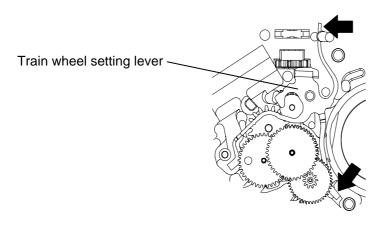

Notes: Since the fifth wheel and pinion and step rotor are made of plastics, take care not to damage them in disassembling and reassembling.

- 8 Train wheel setting lever
- Setting position

### Notes:

- •Catch the part of spring of the train wheel setting lever to the pin like as bellow.
- •Take care not to deform the spring potion of the train wheel setting lever.

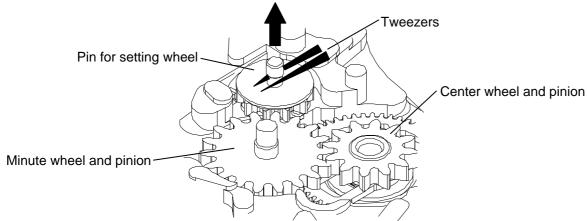

### 9 Pin for setting wheel

Notes:

- In disassembling and reassembling , take care not to damage the portion that is assembled of the pin.
- (Since the portion that is assembled of the pin is made of plastics and easily damaged.)

In disassembling,

pick the pin up main plate to vertical direction with care.

In reassembling,

push the pin in main plate to vertical direction with care.
