

## Luxor® Polishing and Grinding Compounds

High quality polishing and grinding pastes, which are recommended by the industry and are intended for different applications and materials.

The series of seven different pastes covers most of the polishing and grinding from the best.

These specially designed for watchmakers and jewelers polishing compounds have the following advantages:

- Time saving at work
- Clean and slightly oily peaces
- Low consumption
- First-class quality

complete - set  
Art.-No. 515 870

Art.-No.	Color	Grit	Surface	Operation	Application tools	Weight
515 879		6.5 μ	any kinds of metal	preparation (when a strong cut is necessary)	felt- and cotton buffs	110 g
515 874		3 μ	any kinds of metal	preparation (medium cut for small defaults)	felt- and cotton buffs	110 g
515 876		1 μ	platinum	preparation	felt- and cotton buffs	110 g
515 875		1 μ	non ferrous ( e.g. brass, cooper)	high-gloss-polish	cotton- and mira buffs	110 g
515 872		0.3 μ	stainless steel / silber / platinum grey- and white gold	high-gloss-polish	cotton- and mira buffs	110 g
515 877		0.5 μ	yellow- and pink gold	high-gloss-polish	cotton- and mira buffs	110 g
515 878		0.1 μ	precious and fragile metals	mirror-polished for extremely good brightness	cotton- and mira buffs	110 g

## The LUXOR® series: Versatile and powerful

Easy to use features from the Luxor® series, which consists of seven different polishing pastes and for most polishing is best suited.

The Luxor® polishing and grinding compounds are small cylindrical rods of manageable size (Ø 30 x 80 mm) in different colors.

Each color corresponds to

- a specific surface structure (rough finish, high gloss, mirror finish, etc.)
- to a specially treated material (hard metals, soft metals, paints, etc.)
